

Assessing Casualties

Always remember the
EMERGENCY PROCEDURE

- **ASSESS**

What is wrong? What dangers are there?

- **MAKE SAFE**

Do not let the casualty or on-looker be put in further danger..and do not turn yourself into another casualty by rushing to help..

- **EMERGENCY AID**

Use any necessary life-saving techniques...but do not try to do too much!

- **GET HELP**

Give accurate information and (if you are using the telephone) do not hang up until the other person does.

**THE DIFFERENCE BETWEEN LIFE AND DEATH
MIGHT BE A FEW MINUTES (OR EVEN A FEW SECONDS)
OF YOUR TIME.**
